

Supramolecular Chemistry : Rhenium(I) Metallacyclic Compounds

Filesize: 6.91 MB

Reviews

An exceptional publication as well as the font employed was exciting to see. it was actually writtern extremely flawlessly and helpful. Once you begin to read the book, it is extremely difficult to leave it before concluding.
(Dominic Collins)

SUPRAMOLECULAR CHEMISTRY : RHENIUM(I) METALLACYCLIC COMPOUNDS

LAP Lambert Academic Publishing Sep 2014, 2014. Taschenbuch. Condition: Neu. This item is printed on demand - Print on Demand Neuware - Self-assembly of neutral Rhenium(I)-based supramolecules via orthogonal-bonding approach in an one-pot process under solvothermal condition is achieved in high yields. Various types of assemblies can be created based on the nuclearity of the luminophore including bimetallic, trimetallic materials, rectangles, cages and boxes. The structural characteristics of the ligands as well as the metal centers present in the neutral supramolecules allow easy tuning of their emission properties. The neutral supramolecular structures are unique in their well-defined shapes and sizes and would be expected to function as a host with a large internal cavity sizes generated by the tailored ligands. Hence, the presence of photophysical properties and the cavity sizes of these neutral supramolecules make them intriguing hosts for guest molecules. This monograph provides an overview of the structures, properties and applications of neutral rhenium(I)-based supramolecules. 52 pp. Englisch.
