

PROPERTIES OF BAMBOO Influence of Volume Fraction and Fibre Length

By Gbasouzor Austin Ikechukwu

LAP Lambert Academic Publishing Mai 2014, 2014. Taschenbuch. Book Condition: Neu. 220x150x5 mm. This item is printed on demand - Print on Demand Neuware - Natural bamboo fibre-reinforced composite are biogradable, lightweight and non-corrosive. They have good temperature resistant and low environment pollution. These advantages placed the natural fibre composite among the high performance composites. The compounding and the volume fraction of these materials will determine the performance and hence the acceptability to these composites as an engineering materials. This book covers the extraction of fibre strand from bamboo tree, fibre treatment, arrangement of fibre chopped strand into random mat and formation of laminate. The effects of fibre length and volume fraction on the mechanical properties were investigated. The possible modifications to improve the fibre wettability and decrease moisture absorption were considered. The analysis presented in this book should be useful to professionals in manufacturing and building industries. Material engineering students and anymore interested in material science will treasure this book. 76 pp. Englisch.

Reviews

This ebook can be worthy of a read, and much better than other. I have read and i am certain that i am going to planning to go through again once again in the future. You may like just how the writer compose this book.

-- Mr. Grant Stanton PhD

A whole new eBook with an all new standpoint. It is actually rally fascinating throug reading through time period. You wont truly feel monotony at anytime of your own time (that's what catalogues are for relating to when you request me).

-- Claire Bartell
