Reviews

This publication is worth getting. it was writtern really flawlessly and valuable. Its been designed in an exceedingly easy way and is particularly only right after i finished reading this ebook through which in fact altered me, affect the way i believe.
(Lester Ebert)

FLORA OF AUSTRALIA VOLUME 44A: POACEAE 2 (PAPERBACK)

CSIRO Publishing, Australia, 2009. Paperback. Condition: New. Language: English . This book usually ship within 10-15 business days and we will endeavor to dispatch orders quicker than this where possible. Brand New Book. Volume 44A of the Flora of Australia documents four subfamilies of the grass family Poaceae, describing 80 genera and 405 species. The largest subfamily is the Pooideae, a predominantly temperate group with many annual species. It includes the large endemic genus *Austrostipa*, an important component of native pastures, but one which also contaminates wool and injures stock with its penetrating seeds . *Poa*, also largely endemic, grows mainly in southern areas of Australia, and is characteristic of higher altitudes. The subfamily also includes our most important grain crops, wheat, barley, rye and oats, and introduced temperate pasture grasses. There are also many weedy genera such as *Briza* and the economically significant *Nassella*. The largely tropical Bambusoideae are poorly represented in Australia, with only three native species and another three naturalised. Many ornamental species of bamboo are grown in Australia, but few have become naturalised. Also tropical is the subfamily Pharoideae. It includes *Leptaspis*, with its strange inflated florets, the subject of the cover painting. The final subfamily, the Ehrhartoideae, contains another important grain crop, rice, as well as the widespread weedy genus *Ehrharta*.
