The face of the increasingly serious problem of industrial pollution. human industrial activities should mimic natural ecosystems. harmoniously integrated into the natural ecosystem material cycling and energy flow system of the industrial system. by-product of a production process to become another production process the raw materials. the entire industrial system into a variety of resources (energy. water and raw materials) circulating the closed-loop system. improved economic performance under the premise of protecting the ecological environment. The book uses empirical research and normative research. quantitative analysis and qualitative analysis of the combined study of regional industrial symbiosis network system. The research areas covered by the regional industrial symbiosis network more broadly. the book broad interest eco-industrial park to carry out research for the study. First. the literature search and inspection lasted nearly five years of research in related fields.; Research topics. combined with the author in recent years chaired the typical eco-industrial park pilot units were in-depth. detailed field research. Second. the international comparative study of industrial symbiosis network. provides solid empirical support for the entire study; same time. a comparative study revealed that the problem has also become the entry point of the next special study. For the weak link of the research at home...
