

Guideline for Development of Effective Water Sharing Agreements (ASCE/SEI 60-12) (Paperback)

By American Society of Civil Engineers

American Society of Civil Engineers, United States, 2012. Paperback. Condition: New. Language: English . Brand New Book. Guideline for the Development of Effective Water Sharing Agreements provides the basis for developing a complete, comprehensive, and well-integrated agreement for allocating and managing shared water resources. Effective water allocation and management requires planning and regulation by water basins, which often cross national, state, or tribal boundaries. The need to share these water resources inevitably breeds conflict, which can be best alleviated by an agreement among the different political organizations having jurisdiction over water allocation and water management. This Standard outlines a process to ensure that all pertinent factors are considered in the development of an agreement, so that the physical realities of the shared resources-as well as the different political systems, cultures, and water use customs-are accommodated. The Standard assesses the factors influenced by shared water use: correlating the geographical and political issues, inventorying the sources and uses of the water resource, analysing the ecological impact of the transboundary use, and examining its effect on economic growth and quality of life of the various constituents. The Standard then presents alternatives for allocation of surface, underground, and atmospheric water among the parties, with...
