That good mental training, some literary culture and familiarity with the laws and phenomena of nature are useful to the farmer, is no longer denied. That chemistry, by revealing the composition of air, water, soils and manures, as well as of plants and animals, has rendered a rational system of agriculture possible, is universally admitted. The chemical force, however, exerts its influence principally upon dead matter, and is subordinate to that other greater mystery which organizes mineral substances into those varied forms of vegetation which clothe the earth with beauty and furnish the indispensable food of animals. Baron von Liebig has said: The scientific basis of agriculture embraces a knowledge of all the conditions of vegetable life, of the...
