Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from The Number System of Arithmetic and Algebra Some twenty years of university teaching, and some six or seven years chairmanship of Public Examination Boards in this university, have convinced the writer of the need, from these two different points of view, for such a book. Part I. Fulfils an undertaking to provide the kind of help that seems to be necessary for teachers, and their pupils, in school work - besides being the necessary foundation of the wider plan. The thesis of Part I. Is that the principles of Arith metic-and-algebra constitute a scheme which is one and indivisible: that algebraic principles are necessary for the understanding of the rules of Arithmetic and that, on the other hand, these principles of Algebra can be properly understood only when applied at every point to the arithmetical facts which form their essential subject-matter. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
