

Iron Line Diagnostics in X-ray Sources

By Treves, Aldo / Perola, Giulio C.

Condition: New. Publisher/Verlag: Springer, Berlin | Proceedings of a Workshop Held in Varenna, Como, Italy, 9-12 October 1990 | Transitions from the innermost shells of iron, especially the K- and L-shell lines, provide a powerful tool for probing the physical characteristics of hot plasmas in X-ray sources. Their strength and purity allow important conclusions to be drawn even with modest energy resolution. They should also help in studying the regions around blackholes and neutron stars. In this book the state of the art and the most recent theoretical and experimental observations are presented. The book will be a valuable source for future satellite missions. It addresses both researchers and graduate students in astrophysics. | Iron L-shell line formation in diverse astrophysical environments.- X-ray lines in stellar coronae.- Low-resolution spectra of stellar coronae and flares with exosat: The iron K line.- GINGA observations of AB Doradus.- Line spectroscopy in supernova remnants.- Thermal X-ray emission from centre-filled supernova remnants.- Non-Equilibrium, non-LTE ionization in supernova remnants.- SPARTAN 1 X-ray observation of diffuse emission at the galactic center.- Iron line diagnostics in elliptical galaxies and cluster cooling flows.- Iron line emission features in clusters of galaxies.- Spartan-1 X-ray observations of iron line emission in the Perseus cluster.- The distribution of iron in galaxy clusters -

Reviews

This book is definitely not simple to begin on studying but quite fun to see. I actually have read and that I am sure that I will gonna read through yet again once again in the foreseeable future. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- Brennan Koelpin

Comprehensive guide! It's this type of very good read through. It is actually written in simple words and phrases rather than difficult to understand. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- Bernie Mante PhD
