Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Laboratory Manual of Psychology, Vol. 2 The use of laboratory exercises in the teaching of psychology is a matter regarding which there is the widest divergence of opinion and practice in American institutions. In many colleges and normal schools, text-book courses pure and simple are the only courses offered. In other quarters a few typical experiments are demonstrated to the class as a whole. In a small number of institutions each student is given an opportunity at some time in his course for individual laboratory work. The present volume is prepared with a view to facilitating the introduction of this last-mentioned form of instruction into a larger circle of institutions. The two questions which immediately arise in connection with such a course are, When should it be introduced, and what equipment is necessary to make it successful? The matter of equipment is fully dealt with in another volume, and no detailed discussion need be given here.
