

## Grid Resource Management

Filesize: 2 MB

### **Reviews**

*Extensive guideline! Its such a great go through. It is definitely basic but surprises in the 50 % of the pdf. It is extremely difficult to leave it before concluding, once you begin to read the book.*

## GRID RESOURCE MANAGEMENT

[DOWNLOAD](#)

Condition: New. Publisher/Verlag: Springer, Berlin | On-demand Provisioning, Advance Reservation, and Capacity Planning of Grid Resources | In a dynamic computing environment, such as the Grid, resource management plays a crucial role for making distributed resources available on-demand to anyone from anywhere at any time without undermining the resource autonomy; this becomes an art when dealing with heterogeneous resources distributed under multiple trust domains spanning across the Internet. Today Grid execution environments provide abstract workflow descriptions that need a dynamic mapping to actual deployments; this further accentuates the importance of resource management in the Grid. This monograph renders boundaries of the Grid resource management, identifies research challenges and proposes new solutions with innovative techniques for on-demand provisioning, automatic deployments, dynamic synthesis, negotiation-based advance reservation and capacity planning of Grid resources. The Grid capacity planning is performed with multi-constrained optimized resource allocations by modelling resource allocation as an on-line strip packing problem and introducing a new solution that optimizes resource utilization and QoS while generating contention-free solutions. On-demand resource provisioning becomes possible by simplifying abstract resource descriptions independent from the concrete installations. The book further explains the use of the semantic web technologies in the Grid to specify explicit definitions and unambiguous machine interpretable resource descriptions for intelligent resource matching and synthesis; the synthesis process generates new compound resources with aggregated capabilities and prowess. The newly introduced techniques have been developed and integrated in ASKALON Grid application development and runtime environment, deployed in the Austrian Grid, and demonstrated through well performed experiments. | Overview.- Model.- Brokerage.- Grid Resource Management and Brokerage System.- Grid Activity Registration, Deployment and Provisioning Framework.- Planning.- Allocation Management with Advance Reservation and Service-Level Agreement.- Optimizing Multi-Constrained Allocations with Capacity Planning.- Semantics.- Semantics in the Grid: Towards Ontology-Based Resource Provisioning.- Semantics-Based Activity Synthesis: Improving On-Demand Provisioning and Planning.- Conclusion.- Conclusion....
