THE MUTUAL RELATIONS OF THE CIRCLE, THE SQUARE, THE CUBE, AND THE SPHERE. Some of the properties of the circle having been considered in Part II; Sec; V. , it appears desirable to append to this inquiry a few of the results of an investigation into the relations of the circle to the square, and through these of the cube to the sphere, with a view to determining the differences resulting from changes in form in surface areas or enclosed contents, and more especially those produced by transition from angular to curvilinear figures; In order to do this in a reliable manner, it will be advisable to commence with the rectangle, and consider--1. The variations which arise in the contained areas of parallelograms through slight additions to their circumferences; and 2. Those which occur through changes in form in those whose circumferences are equal...

Reviews

An exceptional pdf and the typeface utilized was fascinating to read through. It can be written in straightforward words and phrases instead of confusing. I am just quickly could possibly get a delight of looking at a written ebook.

-- Prof. Arlie Bogan

It is a single of the best book. This is for those who state there had not been a well worth reading through. Once you begin to read the book, it is extremely difficult to leave it before concluding.
