

Wintering Beef Cattle in the Appalachian Region (Classic Reprint) (Paperback)

By William Henry Black

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Wintering Beef Cattle in the Appalachian Region The winter feed bill is the greatest problem facing cattlemen in every beef producing area. The winter feed costs generally constitute two thirds of the yearly cost. It is therefore important to feed a combination of feeds that will produce satisfactory results at the lowest cost. Grass should be depended on to produce the bulk of gain in weight. Beef cattle that make large winter gains do not gain so much on grass the following summer as those that have made only slight gains or maintained their weight during the winter. It is desirable to have calves and yearlings put on from 50 to 75 pounds during the winter, but it is not necessary for older cattle to make any appreciable gain.
