## MICROWAVE PHOTONIC SIGNAL PROCESSING

[DOWNLOAD](#)

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Filtering and Phase Shifting | Microwave photonic signal processing has attracted significant interest in diverse areas including communications, radars, sensors, instrumentations and so on. This is because it offers the prospect of realising extremely high multigigahertz sampling frequencies, overcoming inherent electronic bottlenecks for processing wide bandwidth signals. Besides that, it also has the supplementary advantages of tunability, reconfigurability and immunity to electromagnetic interference. This book presents two novel Sagnac loop based microwave photonic notch filters and two novel photonic microwave phase shifters. The performance of these processors is significantly improved compared with previous approaches, such as the resolution and the group delay of the notch filter, and the bandwidth and the complexity of the phase shifter. This book is intended for researchers and graduate students in the fields of photonics, optical engineering and microwave photonics. | Format: Paperback | Language/Sprache: english | 200 pp.
