WORLD LEADERSHIP: HOW SOCIETIES BECOME LEADERS AND WHAT FUTURE LEADING SOCIETIES WILL LOOK LIKE (HARDBACK)

Living Tree Publishing, 2017. Hardback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.The United States is the dominant world power today, but that has not always been the case, and may not always be the case. Some changed the way resources are managed. Others changed the environment. Some gave a society dominance through military strength and wealth. Whenever a society embraced these innovations early, it gained leadership power and influence over rivals. Understanding how leadership develops is imperative now because the world is changing. New transformative innovations have arrived and by the end of this century, the world will likely be transitioning to its next societal level, the nation-union. The society that prepares for this now will be best positioned for leadership in the next century. Understanding leadership also unlocks mysteries about our contemporary world such...
