

Language and Space

By -

MIT Press Ltd, United States, 1999. Paperback. Book Condition: New. New edition. 229 x 177 mm. Language: English . Brand New Book ***** Print on Demand *****.The study of the relationship between natural language and spatial cognition has the potential to yield answers to vexing questions about the nature of the mind, language, and culture. The fifteen original contributions in Language and Space bring together the major lines of research and the most important theoretical viewpoints in the areas of psychology, linguistics, anthropology, and neuroscience, providing a much needed synthesis across these diverse domains. Each chapter gives a clear up-to-date account of a particular research program. Overall, they address such questions as: how does the brain represent space, how many kinds of spatial representations are there, how do we learn to talk about space and what role does culture play in these matters, should experimental tests of the relations between space and language be restricted to closed-class linguistic elements or must the role of open-class elements be considered as well? Throughout authors speak to each other's arguments, laying bare key areas of agreement and disagreement. Contributors: Manfred Bierwisch, Paul Bloom, Melissa Bowerman, Karen Emmorey, Merrill Garrett, Ray Jackendoff, Philip...

Reviews

This book is definitely not straightforward to get started on studying but extremely exciting to read. It is really simplistic but shocks in the 50 percent of the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- Ally Reichel

This publication is amazing. It is definitely basic but shocks in the fifty percent of your publication. You won't feel monotony at anytime of your own time (that's what catalogues are for concerning if you question me).
