Brand New Book ***** Print on Demand *****.Excerpt from Livestock and Meat Situation: April, 1975 The impact of unstable market conditions, high feed costs, and the severe cost-price squeeze faced by livestock producers during the past 18 months continue to dominate the livestock situation. Cattle slaughter is up as cattlemen take steps to adjust record inventories to the available feed supply. Cattle feeding and hog production have been curtailed and further reductions are likely throughout 1975. Large supplies of red meat have held down meat prices this winter. Per capita meat consumption during january-march will be down slightly from last fall but well above the january-march 1974 level. Increases in beef and veal consumption have more than offset reduced pork and lamb consumption. Retail meat prices have generally trended lower since last September, and in February averaged 9 percent below the February 1974 level. But expected seasonal reductions in beef and pork supplies this spring are likely to push retail meat prices higher again.
