VOLUME RENDERING

Condition: New. Publisher/Verlag: VDM Verlag Dr. Müller | Out-of-Core Algorithms and Parallel Rendering | Rendering volumetric data, as a compute/communication intensive and highly parallel application, represents the characteristics of future workloads for desktop computers. Interactively rendering volumetric data has been a challenging problem due to its high computational and communication requirements. While the new multi-core architecture trend in PC provides new opportunities, widespread use of those parallel processors requires extensive changes in previous algorithms to take advantage of the new...
