

Biological Markers of Alzheimers Disease Research and Perspectives in Alzheimers Disease

By -

Springer. Paperback. Condition: New. 169 pages. Dimensions: 9.6in. x 6.6in. x 0.5in. This volume presents the proceedings of the symposium held in Toulouse on April 24, 1989, on the topic Biological Markers of Alzheimers Disease. This symposium was the fourth of a continuing and successful series of Colloques Medecine et Recherche organized by the Fondation IPSEN pour la Recherche Therapeutique, addressing various aspects of contemporary research in the field of Alzheimers disease (AD). The series started in September 1987 with Immunology and Alzheimers Disease, followed 6 months later in Paris by Genetics and Alzheimers Disease and in September 1988 in Montpellier by Neuronal Grafting and Alzheimers Disease. The present symposium was organized for the purpose of gathering the most current ideas concerning biological markers of AD. The papers presented at this symposium may be roughly subdivided into three groups. The first deals with the markers of AD at the level of the brain itself. These markers are studied either through the cerebrospinal fluid or through techniques such as nuclear magnetic resonance (NMR) - approaches which respectively aim at demonstrating the cerebral changes indicated by the debris resulting from the disease, or studying the possible neurochemical abnormalities that occur...

Reviews

The most effective pdf i possibly read. It is amongst the most amazing publication i actually have go through. You are going to like the way the author publish this pdf.

-- Chelsea Durgan PhD

I actually started off looking over this pdf. I am quite late in start reading this one, but better then never. Once you begin to read the book, it is extremely difficult to leave it before concluding.
