Science-Gossip, Vol. 5: An Illustrated Monthly Record of Nature, Country-Lore and Applied Science; Nov., 1898 (Classic Reprint) (Paperback)

By John T Carrington

Forgotten Books, 2018. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Science-Gossip, Vol. 5: An Illustrated Monthly Record of Nature, Country-Lore and Applied Science; Nov., 1898 It is almost impossible here to give instructions as to the best method of dealing with every individual case, as each material requires some what different treatment. It may, however, be stated that, as a rule, the foreign-matter mixed with the diatoms consists of lime and its compounds, or of extremely fine particles of silicious matter. The lime may be removed either by hydrochloric acid, or by repeated washings with cold pure rain or distilled water. Lime dissolves but very sparingly in hot water, more readily in cold, and after the preparation has been allowed to stand for a day, the clear water will have become milky. This cloudy fluid must be poured off from the sediment, and clear water added, day after day, until no further cloudiness is to be observed. This is a very tedious process, and the operator will probably prefer the use of hydrochloric acid. When all has been done it is almost invariably better to give the preparation a boil with...
