Brand New Book ***** Print on Demand *****.Excerpt from Science, Technology and Development Strategy Might there be some value in thinking about economic development as science capacity? In this view, the developed nation is one that has learned to house scientific activity. At some historical juncture, its humanists and practical men moved over and made room for the scientist. At first the new element s contribution was obscure. His theories were difficult and abstract, but their application through technology gained him understanding and support. Science became an orthodox profession with an independent ethos, and the society gained an important monitoring and regulatory capacity which gave new perspective to the issues that the practical men and the humanists had been unable to resolve. It was now possible to systematically scrutinize and up-date current practice. The society became dynamic, venturesome, growth-oriented. Some underdeveloped societies are without the resources and professional talent that sustained growth requires. Others have them, and yet have not responded to massive resource allocation both from their own bounty and via external aid. Why are the growth processes not now irreversible within these...
