LAP Lambert Academic Publishing Sep 2014, 2014. Taschenbuch. Condition: Neu. Neuware - The concern about global warming effects by continuous exploitation of non renewable fossil fuels and scarcity of electricity generation accelerates the urge for searching alternative source of energy. Development of Microbial fuel cell using microbes present in waste water is the novel approach to treat this hurdle. Apart from biopower generation, it acts as a biosensor. Microbes metabolizes the organic matter present in waste water during the process...
