Conquering Mathematics: From Arithmetic to Calculus (Hardback)

By Lloyd Motz, Jefferson Hane Weaver

Springer Science+Business Media, United States, 1991. Hardback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. We have designed and written this book. not as a text nor for the professional mathematician. but for the general reader who is naturally attracted to mathematics as a great intellectual challenge. and for the special reader whose work requires him to have a deeper understanding of mathematics than he acquired in school. Readers in the first group are drawn to mental recreational activities such as chess. bridge. and various types of puzzles. but they generally do not respond enthusiastically to mathematics because of their unhappy learning experiences with it during their school days. The readers in the second group turn to mathematics as a necessity. but with painful resignation and considerable apprehension regarding their abilities to master the branch of mathematics they need in their work. In either case. the fear of and revulsion to mathematics felt by these readers usually stem from their earlier frustrating encounters with it. viii PREFACE This book will show these readers that these fears, frustrations, and general antipathy are unwarranted, for, as stated, it is not a textbook full of long, boring proofs and...
