MICROALGAE AS A NEW FEEDSTOCK FOR BIODIESEL

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Lab and Outdoor Studies | Recently, microalgal biomass was discussed as a promising feedstock for biodiesel production. The selection of the most suitable conditions to cultivate certain microalga for biodiesel is depends on several key parameters such as growth rate, lipid content, fatty acid profile, and lipid productivity. The green microalga *Scenedesmus obliquus* was widely discussed by phycologists as a promising biodiesel feedstock due to its relatively high biomass and fatty acid...
