Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Sustainable crop production through balanced nutrition is the need of the hour. Judicious use of natural resources viz. soil and water is a must through different techniques viz. soil test based fertilization, green manuring, biofertilizers etc. and these techniques must be reached to the farmer of the region through different training programmes and by conducting onfarm experiments. We are aware that for increasing the food production to fulfill the food requirements of the burgeoning population of the country sustainability of agriculture and environmental safety are the priority issues. To avoid wastage of precious national resource and to minimize the environmental damage there is need develop and demonstrate balanced use of chemical fertilizer. Soil testing is a tool which helps us to quantify the different fertilizers based on the crop need and soil supply. But correct technique for soil sampling is equally important which further provide us correct information regarding soil nutrient supplying capacity and hence soil health. | Format: Paperback | Language/Sprache: english | 56 pp.
