

Models of Madness: Psychological, Social and Biological Approaches to Psychosis (Hardback)

Filesize: 5.47 MB

Reviews

This book will not be simple to get going on reading but extremely exciting to read through. Yes, it can be play, still an interesting and amazing literature. I am very easily could possibly get a delight of reading a written book.

MODELS OF MADNESS: PSYCHOLOGICAL, SOCIAL AND BIOLOGICAL APPROACHES TO PSYCHOSIS (HARDBACK)

[DOWNLOAD PDF](#)

Taylor Francis Ltd, United Kingdom, 2013. Hardback. Condition: New. 2nd Revised edition. Language: English . Brand New Book ***** Print on Demand *****.Are hallucinations and delusions really symptoms of an illness called schizophrenia ? Are mental health problems really caused by chemical imbalances and genetic predispositions? Are psychiatric drugs as effective and safe as the drug companies claim? Is madness preventable? This second edition of Models of Madness challenges those who hold to simplistic, pessimistic and often damaging theories and treatments of madness. In particular it challenges beliefs that madness can be explained without reference to social causes and challenges the excessive preoccupation with chemical imbalances and genetic predispositions as causes of human misery, including the conditions that are given the name schizophrenia . This edition updates the now extensive body of research showing that hallucinations, delusions etc. are best understood as reactions to adverse life events and that psychological and social approaches to helping are more effective and far safer than psychiatric drugs and electroshock treatment. A new final chapter discusses why such a damaging ideology has come to dominate mental health and, most importantly, how to change that. Models of Madness is divided into three sections: * Section One provides a history of madness, including examples of violence against the mentally ill , before critiquing the theories and treatments of contemporary biological psychiatry and documenting the corrupting influence of drug companies. * Section Two summarises the research showing that hallucinations, delusions etc. are primarily caused by adverse life events (eg. parental loss, bullying, abuse and neglect in childhood, poverty, etc) and can be understood using psychological models ranging from cognitive to psychodynamic. * Section Three presents the evidence for a range of effective psychological and social approaches to treatment, from cognitive and family therapy to primary prevention. This...
