GAO found that: (1) semipostal stamps are generally special stamps with a surcharge of about 50 percent above the normal postal rate; (2) sales of the stamps could generate an estimated \$12 million annually, based on information from foreign countries with semipostal sales experience; and (3) the Postal Service (USPS) estimated that sales would be less than \$110 million annually, based on its experience with stamp collectors. GAO also found that USPS opposes the sale of semipostal stamps because of the: (1) possible negative effect on the stamp-collecting market, which generates approximately \$187 million per year; and (2) administrative expenses of accounting for semipostal stamps at over 40,000 post offices nationwide.
