Reviews

This ebook can be worthy of a read, and much better than other. I have read and i am certain that i am going to planning to go through again once again in the future. You may like just how the writer compose this book.

(Mr. Grant Stanton PhD)

A READER IN HEALTH POLICY AND MANAGEMENT (HARDBACK)

OPEN UNIVERSITY PRESS, United Kingdom, 2011. Hardback. Condition: New. New.. Language: English . Brand New Book. I enjoyed leafing through this collection, and seeing some of the modern classics in the sociology of health excerpted - the excerpts being almost impossibly brief, although understandably so. It is good for academic-jockeys to lead practitioner-horses to the edge of heady intellectual waters- as long as they don't end up the infamous creek without a paddle. Enough mixed metaphors. I enjoyed it - really. Calum Paton, Professor of Health Policy, Keele University, UK This book introduces the reader to many of the most important debates in health policy today through a judicious selection of contributions from a range of disciplines. It will be invaluable in helping students find their way in to a diverse and complex field of study, and should also whet their appetites to go to the sources to explore these debates in greater depth. Chris Ham, Professor of Health Policy and Management, Health Services Management Centre, University of Birmingham, UK This book shows the great benefits of expert selection of the best writings on the subject. Our starting point for the future is what we inherit - the ideas and structures from the past. This book shows us how we got here, and the choices for the future. In an age of Kindle and downloadable PDFs, this selection of the best in one place is invaluable to researchers, practitioners, and leaders of learning programmes. We are shaped by history, but unknowingly. Knowing our history, can free us from it. We can build on the best and avoid repeating old mistakes. Dr John Ovretveit, Director of Research and Professor of Health Innovation and Evaluation, Medical Management Centre, The Karolinska Institutet, Stockholm, Sweden The authors have collected a good range of...
