

## Geological Magazine (Volume 14 )

Filesize: 9.08 MB

### ***Reviews***

*Thorough information! Its such a good study. Sure, it is perform, still an amazing and interesting literature. Once you begin to read the book, it is extremely difficult to leave it before concluding.*  
*(Evie Emmerich)*

## GEOLOGICAL MAGAZINE (VOLUME 14)

General Books. Paperback. Book Condition: New. This item is printed on demand. Paperback. 298 pages. Dimensions: 9.7in. x 7.4in. x 0.6in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1877 Excerpt: . . . this is not strictly true, because the former zone contains beds of Gault Clay which have never been included in the Upper Greensand. The real fact is, that recent researches have shown the formations known as Gault and Upper Greensand each to consist of two divisions, but the lower part of the one being united palaeontologically with the upper member of the other, only three wellmarked groups can be established. Supposing, therefore, that the names of Gault and Upper Greensand are still retained, we must decide to which of the two this intermediate zone more probably belongs, whether in fact we should extend the Greensand downward or the Gault upward. I would advocate the latter measure, and the restriction of the term Upper Greensand to the group of beds containing a Warminster fauna; with regard to stage B, containing *Ex. conica* (the Upper Greensand of Mr. Meyer), I do not think Dr. Barrois gives very strong reasons for classing it in the lower division; it is true that it does not contain many fossils, and that these do not indicate any marked affinities, but the large *Janira cequicostata* is I think mostly found in the Warminster beds; its lithological constitution certainly links it rather with the upper than the lower beds. I would suggest, therefore, that the zone B of *Ex. conica* be included with the Warminster beds, and that the limit of the lower division be placed at the shingle beds in No. 4...
