

An Analysis of Speeding-Related Crashes: Definitions and the Effects of Road Environments (Paperback)

By National Highway Traffic Safety Administ

Createspace Independent Publishing Platform, United States, 2013. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Speeding is reported in the Fatality Analysis Reporting System (FARS) as a driver-level attribute that combines driving too fast for conditions or in excess of posted speed limit. There is a growing need to parse out these two factors, especially for those designing countermeasures. The report, using data from the State Data System quantifies the extent of these two aspects related to speeding using data from six States whose police accident reports actually parse these out.

Reviews

Merely no words to explain. I really could comprehend everything out of this published e book. I found out this publication from my dad and i suggested this publication to learn.

-- Prof. Margarita Ledner PhD

This written pdf is fantastic. It normally is not going to expense a lot of. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- Gilbert Stroman
