Brand New Book ***** Print on Demand *****.Excerpt from The Rainbow Pages Telecommunication networks have the power to bring people together. Unfortunately, text-based bulletin boards require personal computers as front-ends and that restricts access to only those individuals and organizations that can afford to purchase computers. A voice bulletin board, on the other hand, uses any touch-tone telephone as a front end, and most people in this country already own or can afford to purchase a touch-tone telephone. This paper describes the rationale for and design of a free, public-access voice bulletin board that attempts to bring the power of computing to the people of one neighborhood in Boston.
