

The MOM Chronicles: ISA-95 Best Practice Book 3.0 (Paperback)

By -

ISA, United States, 2013. Paperback. Condition: New. Language: N/A. Brand New Book. Springing from the international success of Books 1.0 and 2.0, the ISA-chartered ISA-95 Best Practices Working Group, chaired by Charlie Gifford, brings out its third collection of Manufacturing Operations Management (MOM) methodology white papers. The Book 3.0 collection focuses on MOM system engineering to organise the complex 21st-century manufacturing plant and to optimise its role in a global supply chain. The methods do not trivialise the complexities as simply equipment optimisation or material quality or consumption problems. In the twenty-year evolution of computerised manufacturing solutions, most manufacturers primarily applied and still apply point solutions to department issues. Book 3.0 explains how to develop an overall operations process definition. This definition determines operations dependencies for the entire plant in the supply network. The operations process definition as the MOM Master User Requirement Specification maps out the As-Is inefficient operations and the To-Be reengineered efficient operations. Current leaders and managers of most manufacturers have a very limited vision of how their plants must operate in the global market in five or ten years to be competitive in 2020 2025. Today s manufacturing managers generally do not have a concept of...

Reviews

Very useful for all group of people. It is amongst the most incredible pdf i actually have read through. Its been written in an extremely straightforward way and it is just right after i finished reading through this pdf by which basically modified me, change the way i think.

-- Felicia Nikolaus

These sorts of ebook is the ideal book offered. It can be writter in simple terms rather than confusing. I discovered this pdf from my dad and i advised this publication to understand.
