NONIMAGING OPTICS IN SOLAR ENERGY

Morgan & Claypool. Paperback. Book Condition: New. Paperback. 120 pages. Dimensions: 9.1in. x 7.5in. x 0.6in. Nonimaging optics is a subdiscipline of optics whose development over the last 3540 years was led by scientists from the University of Chicago and other cooperating individuals and institutions. The approach provides a formalism that allows the design of optical devices that approach the maximum physically attainable geometric concentration for a given set of optical tolerances. This means that it has the potential to revolutionize...
