

Army Training: Improvements Are Needed in 5-Ton Truck Driver Training and Supervision: Gao-01-436

By -

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 30 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. Instructor shortages are affecting the quality and quantity of Army truck driver training. Fort Leonard Wood, which trains about 90 percent of truck drivers, is especially affected by the instructor shortage. The result is that student drivers are not fully trained in all aspects of the instruction program when they graduate. If formal schools had enough instructors, they would presumably be able to teach the entire instruction program. The student imbalance between the schools at Fort Leonard Wood and Fort Bliss creates an ineffective use of resources. If the annual student load were more equally distributed between the two schools, student graduates from Fort Leonard Wood might receive more complete training. The formal schools are not adhering to the instruction program, which calls for some training with trucks carrying cargo. Furthermore, no training is provided on how to pull equipment. Similarly, students are not being trained to drive under different weather and surface conditions. Because annual check rides and sustainment are not always being performed, unsafe driving habits may go undetected. Although performing and recording check rides and sustainment may be...
