Response to Hazardous Materials incidents has changed over the years. If one was a First Responder 20-30 years ago, one had to be concerned about transportation accidents involving hazardous cargoes, fires and hazardous materials and wastes at fixed sites. While many of us were trained in the basics of Weapons of Mass Destruction, it was generally theory and few expected to have to actually respond to an incident involving these materials. Responses to Clandestine Laboratories were not as common and terrorism was something that happened elsewhere and not in the United States. Today the world is a very different place: -The drug epidemic especially for methamphetamine has virtually overwhelmed the Law Enforcement and Response Community. First Responders, whether Law, Fire or EMS personnel frequently encounter Meth Labs even in nice neighborhoods or in rural settings. Harder drugs and synthetic opioid labs are being run by gangs in many states and television shows and popular music about drug makers, dealers and kingpins are common. -Clandestine laboratories related to terrorist activities are now common throughout the world and there are numerous examples of...

## Reviews

This pdf is really gripping and intriguing. it was actually writtern very completely and beneficial. You wont really feel monotony at whenever you want of your time (that's what catalogues are for about in the event you request me).
