Perigee. 1 Paperback(s), 2014. soft. Book Condition: New. Though it often seems like there's nothing we can count on these days, mechanical engineer and unrepentant science geek Christine McKinley has some good advice: trust the laws of gravity, motion, energy, and entropy. In this funny, smart, and surprisingly practical book, McKinley explains everything from sound and light waves to momentum, buoyancy, magnetism, and relativity, and offers advice on how to use them in our everyday lives. Whether you're a secret agent trying to cover your tracks, a war correspondent ducking into a bomb shelter, or simply trying to execute the perfect rock-star stage dive, understanding physics can mean the difference between life and death (or at least looking kind of silly)."Christine McKinley presents science as performance art. She shows us how to use physics to perform fancy microphone throws, escape from a sinking car with outfit intact, discover your true identity, stop pointlessly spinning your wheels, handle chaos, keep secrets. Yes, there are equations, but they add to the fun as well as the understanding; even the quizzes make you laugh out loud. It's the real deal, and a wild ride to boot."K.C. Cole 247.
