Reviews

This book may be worth purchasing. I am quite late in start reading this one, but better then never. Once you begin to read the book, it is extremely difficult to leave it before concluding.

BOAT NAVIGATION FOR THE REST OF US: FINDING YOUR WAY BY EYE AND ELECTRONICS (2ND REVISED EDITION)

International Marine Publishing Co. Paperback. Book Condition: new. BRAND NEW, Boat Navigation for the Rest of Us: Finding Your Way by Eye and Electronics (2nd Revised edition), Bill Brogdon, Robert M. Groves, "Superb and amazingly comprehensive." - Cruising World. "Thorough treatment of traditional and electronic methods by an expert." - "WoodenBoat". "Boat Navigation for the Rest of Us" is the only book that teaches navigation the way small-boat skippers actually navigate: by combining electronic aids like GPS and radar with commonsense visual piloting skills and simple chartwork. This second edition covers important developments in electronic navigation, including dramatic improvements in GPS accuracy, the growing popularity of electronic charts and plotting systems, and the increasing availability of navigation information over the Internet. It's a full course in navigation plus a whole toolbox of little-known tips and shortcuts to deal with real-life situations without a slide rule.
