(HARDBACK)**

FBC LTD, 2017. Hardback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from The Boston Medical and Surgical Journal, Vol. 184: January 20, 1921 If time permitted, there are various other medical complications following surgical operations that might profitably be considered. The prevention and treatment of the various types of pneumonia - lobar, broncho, embolic, and hypostatic - deserve attention. Acute oedema of the lungs, lung abscess following tonsillectomy, and the secondary anemia which so often follows a major surgical operation on the elderly patient, all furnish interesting material for consideration, but lack of time forbids further discussion.
