

Facts about Fisheries an Aquaculture

By Claudia Körber

GRIN Verlag Jul 2008, 2008. Taschenbuch. Book Condition: Neu. 210x148x1 mm. This item is printed on demand - Print on Demand Neuware - Seminar paper from the year 2005 in the subject Environmental Sciences, grade: 2,0, University of Applied Sciences Constanze, course: Environmental Economics, 19 entries in the bibliography, language: English, abstract: Fish represents a major component of the food supply for the world's population. It makes a very significant contribution to the diet of many fish consuming communities in both the developed and developing world. It is accounting for almost one-fifth of all animal protein in the human diet. Fisheries and Aquaculture remain very important to many countries and communities as a source of food, employment and revenue. Although fish is a renewable resource, it is also destructible. Current fishing levels and methods place significant pressure on world fisheries and marine ecosystems. [...] 20 pp. Englisch.
