

Nanotechnology: Nanomaterials and Nanostructures (Volume 4)

Filesize: 8.52 MB

Reviews

This pdf is fantastic. It really is basic but shocks inside the 50 % in the pdf. I realized this pdf from my i and dad encouraged this pdf to discover.

(Hunter Witting)

NANOTECHNOLOGY: NANOMATERIALS AND NANOSTRUCTURES (VOLUME 4)

To read **Nanotechnology: Nanomaterials and Nanostructures (Volume 4)** PDF, remember to follow the link under and save the document or have accessibility to additional information that are relevant to NANOTECHNOLOGY: NANOMATERIALS AND NANOSTRUCTURES (VOLUME 4) ebook.

Stadium Press LLC / Researchco Books & Periodicals Pvt. Ltd., Houston, Texas, 2013. Hardcover. Condition: New. This volume aims to review the fundamentals and technical aspects in synthesis, fabrication and processing of nanostructures and nanomaterials so as to present the readers an organized and rational portrait of the field. The volume is written with the intention to hand out as a general introduction to people who are naive to this field and for experts hunting for information in other sub-fields. This volume gives an overview of the main concept of classification, preparation and relationship of structure to the application of polymer nanocomposites. Also the book discusses the mechanical analysis of Single Walled Carbon Nanotubes (SWCNT) and their applications. One of the chapter talks about novel approaches for the synthesis of core shell materials using different surface agents and copolymerisation methods. A research overview of preparation, optical and physiochemical properties of metallic (gold, silver, platinum or combination of these metals) and its application in sensing, environmental and energy has been presented in this volume. Recent trends in template synthesis of porous organic polymers via direct or indirect method, physical characterisation are also discussed with its application. This volume also presents a review on coating methods and characterisation of nanostructured ceramic coatings. A comprehensive outline of current research approaches for studying the properties and potential application of ZnO nanostructures. One of the chapter focuses on the study that investigates the stability and thermal properties of nanofluids suspensions in LEDs. A chapter on spark plasma sintering (SPS) is aimed at analysing the factors that influence the microstructure development in the powder mixtures and promising method of fast and effective densification of metallic and ceramic materials. A chapter dedicated to the factors influencing the growth process of Si, SiGe and SiC nanowires, characterisation and its...
