

Les Montres Marines - Description, Theorie Et Perturbations (Paperback)

Filesize: 5.65 MB

Reviews

Extensive manual! Its such a great read. It really is loaded with knowledge and wisdom You wont really feel monotony at at any time of your time (that's what catalogs are for regarding if you ask me).

(Myrl Hintz)

LES MONTRES MARINES - DESCRIPTION, THEORIE ET PERTURBATIONS (PAPERBACK)

Createspace Independent Publishing Platform, United States, 2013. Paperback. Condition: New. Language: French . Brand New Book ***** Print on Demand *****.Cette reedition 2013 en grand format du classique Les Montres marines, revue et augmentee de notes biographiques et bibliographiques et enrichie de schemas techniques et planches, est l ouvrage incontournable de l amateur de chronometres de marine. Ses auteurs, l historien de la marine Alfred Ledieu et le celebre chronometrier et inventeur Auguste Hilaire Rodanet y presentent les contraintes de fabrication du chronometre de marine, son bon usage et les performances que leurs possesseurs peuvent attendre de ces mecaniques horlogeres de haute precision, en passant par une enumeration exhaustive des facteurs, susceptibles ou pas, d exercer une influence sur sa marche. Plus encore, il s agit d un veritable mode d emploi et d entretien du chronometre de marine dont les recommandations s appliquent a tous les chronometres de marine, quels qu eussent ete leurs constructeurs et epoques de fabrication. En cela, Les Montres marines est un livre qui n a aucun equivalent a ce jour. Cet ouvrage interesse egalement deux autres categories de lecteurs: ceux qui souhaitent s informer de toutes les contraintes relatives a la recherche de la precision en horlogerie d une maniere generale; ceux qui, horlogers ou reparateurs-horloger, souhaitent parfaire leurs connaissances concernant les facteurs affectant la marche de tous les types de mouvements horlogers, ou les ingenieurs horlogers de la haute horlogerie qui souhaitent prendre connaissance de toutes les contraintes experimentees dans la cadre des conception et construction des mouvements d horlogerie de tres haute precision.
