By C. Wolf

University of Michigan Libraries. Paperback. Book Condition: New. Paperback. 84 pages. Dimensions: 9.0in. x 6.0in. x 0.2in. Excerpt: . . . anti-psoric remedy. I have generally found Kali carbonicum efficient, of which I gave one globule thirty on the fourth day of the treatment, permitting 42 it to act uninterruptedly from one to three days, according as the disease was more or less acute, after which I again exhibited Apis in the manner previously indicated. In this way I succeeded in developing the curative powers of Apis, so that in a few days a gradual improvement, however slight, became perceptible to the careful observer. As soon as the improvement is well marked, all repetition of the medicine should cease, and the natural reaction of the organism should be permitted to complete the cure. Any one who is acquainted with the action of the Kali, must know that it continues without being interrupted by Apis. An invaluable blessing of Nature! This proceeding is crowned with the desired results; the convalescence is shorter and easier, and there is less danger of serious sequel. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.

Reviews

This publication is amazing. It is definitely basic but shocks in the fifty percent of your publication. You won't feel monotony at anytime of your own time (that's what catalogues are for concerning if you question me).

This kind of book is every little thing and taught me to look ahead of time and a lot more. I am quite late in starting reading this one, but better than never. I found out this book from my dad and I encouraged this PDF to find out.
