

Instrumental methods in the authentication of cultural heritage

By Vornicu, Nicoleta

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Application of instrumental methods in the authentication of cultural heritage. Case studies (painting, book, metal, stone) | The paper contains the author's research findings in the field of authentication and preservation of cultural heritage (paintings, historical and religious monuments, textiles and old books). The theme is approached from an interdisciplinary perspective, involving knowledge of conservation and restoration, materials science, history and art theory, biology, chemistry. This paper presents case studies in which modern methods used in the characterization and authentication materials are X-ray fluorescence, Raman spectroscopy, scanning electron microscopy SEM, optical microscopy, FTIR, etc. The presentation of this information took into account the difficulty encountered by conservators, art historians, restorers or other responsible people in decision making of the dating, conservation and restoration of cultural heritage. The work is of interest to researchers, specialists, teachers, students and for all those passionate about the richness and diversity of cultural heritage. | Format: Paperback | Language/Sprache: english | 60 pp.

Reviews

This book is definitely worth acquiring. I have gone through it and so I am certain that I will likely read through it again in the future. It has been printed in an exceptionally basic way, in fact it is only after I finished reading this publication that I actually altered my opinion, changing the way in my opinion.

-- **Andres Bashirian**

Comprehensive guide for publication fanatics. This really is for all who state there had not been a well worth reading through. I discovered this ebook from my dad and I encouraged this book to find out.
