Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English Brand New Book ***** Print on Demand *****. Excerpt from Applied Mathematics for Junior High Schools and High Schools This book has been written to meet the demand for a practical course in applied mathematics which shall coordinate the schoolroom lesson and the actual problem of the industrial and commercial world. It presents the body of mathematical information which is likely to be of daily service, no matter what one's occupation may be. Applied Mathematics is the outgrowth of twelve years of experimentation in a high school of over two thousand students, and the exercises in the book have stood the test of classroom trial. The examples and problems have been selected from many fields - industrial, commercial, mechanical, agricultural - and, as far as possible, are such as occur in the household, on the farm, in the factory, and at the office. The book gives in teachable form: (1) An adequate treatment of the fundamental operations of arithmetic, with proper attention to modern methods of performing these operations. (2) A consideration of ordinary business transactions. (3) A sufficient acquaintance with the symbols of algebra and of algebraic operations to enable the student to interpret and apply simple formulas. (4) Enough geometry to enable him to compute the areas and volumes of the common geometric figures. (5) A study of graphic charts and their use. (6) Training in the use of mathematical tables. (7) Practice in the power to judge a computed result with reference to its reasonableness. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work,...
