Createspace. Paperback. Condition: New. This item is printed on demand. 102 pages. Dimensions: 9.0in. x 5.9in. x 0.6in. Have you ever wondered why so many companies and their security leaders fail in today's cyber challenges? Regardless if you are new in this role and look for guidance, or you are considering yourself an expert and just wish to verify that you haven't forgotten anything - this book will help you to tackle the subject right - by building security by design. The content covers your initial phases in the job such as setting expectations, baseline, gap analysis, capabilities building, and org chart variances. It then leads you to define security architecture, addressing a secure development process, application security and also security policy levels. Further items such as awareness programs, asset management, teaming up with audit, risk management, and finally the strategy development are covered. Then we dive into ROIs, trust relationships, KPIs, incident response, forensics, before we run into crises management by looking at some specific examples of personal experience of the author - himself a C(I)SO for many years. The book is ending by providing advice how to deal with other executive management, and what kind of education, certifications, and networking you need to focus on. If you consistently apply the content and advice provided in this book, you should be all set to succeed in your role as C(I)SO. This item ships from La Vergne, TN. Paperback.
