

Investigation of throughput and QoS optimization techniques in WMNs

By Ishfaq, Modassir / Bodanese, Eliane L.

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Performance Analysis of MANET's routing protocols in a WMN environment | Wireless Mesh Networks is one of the most promising wireless technologies of the future. Its tolerance factor against the network failures, convenience of set-up and manageability are one of its major advantages. Though WMNs are very similar to Mobile Ad Hoc Networks, the protocols designed for ad hoc perform very poor when applied in WMNs. The research has mainly focused on the evaluation of routing protocols to be used in WMNs. The purpose of studying and comparing these protocols in WMN environment is to propose that which protocol is more adaptive for WMNs and can be further optimized to exploit other salient features of this technology. The simulation and modelling for performance analysis of WMNs has been performed in OPNET for collecting precise data statistics in real time scenarios. | Format: Paperback | Language/Sprache: english | 88 pp.

Reviews

An exceptional pdf and the typeface utilized was fascinating to read through. It can be written in straightforward words and phrases instead of confusing. I am just quickly could possibly get a delight of looking at a written ebook.

-- Prof. Arlie Bogan

It is a single of the best book. This is for those who state there had not been a well worth reading through. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- Dr. Barney Robel Jr.
