

Now Were Talking The Story of Theodore W. Case and Sound-On-Film 1st Books Library

By Antonia K. Colella

AuthorHouse. Paperback. Condition: New. 124 pages. Dimensions: 9.2in. x 6.2in. x 0.3in. Between 1928 and 1929 silent movies slipped away and talkies took over theaters around the world. Movie producers rushed to carve their names on the revolution, pushing aside the scientist who invented the tools that transformed the industry. Now Were Talking is the exciting biography of Ted Case (1888-1944). In a backyard laboratory in Auburn, New York, Ted discovered a way for sound and action to be synchronized on moving film and then replayed as a natural illusion. The book looks at Teds fascination with light and sound waves at Yale University and his top-secret work during World War I. It follows his rise to the pinnacle of motion pictures and exposes the business deals of movie moguls that deprived him of recognition and his lifes legacy. Although written with the intermediate reader in mind, scientists, historians, inventors, movie engineers and students of all ages will be deeply moved by Teds perseverance and passion for research and development. The story of Theodore W. Case, one of the great inventors of the 20th century, has now been told. An important contribution to motion picture history. Fay Vincent, former Chairman of...
