Birkhauser. Paperback. Condition: New. 428 pages. Dimensions: 9.6in. x 6.7in. x 1.0in. Volume 27 of Progress in Drug Research contains 5 articles, a subject index for this volume, an alphabetic subject index for volumes 1-27, and an author and subject index for all the volumes which have so far been published. The contributions of volume 27 are particularly concerned with fungal disease, with benzimidazole anthelmintics and with the chemistry and pharmacology of quinuclidines, azoles, and nitroimidazoles. The authors have tried, not only to summarize the current status of particular fields of drug research, but also to provide leads for future research activity. The articles of this volume will be of special value to those actively engaged in drug research, and to those who wish to keep abreast of the latest developments influencing modern therapy. In addition, it is believed that the 27 volumes of Progress in Drug Research now available represent a useful reference work of encyclopedic character. The editor would like to take the occasion of the publication of this volume to express his gratitude both to the authors and to the readers. The authors have willingly undertaken the great labor of writing significant topical contributions, and many readers have helped the editor with criticism and advice. With these thanks, the editor would like also to express his gratitude to the publisher, Birkhauser Verlag Basel, particularly to Messrs. Th. Birkhauser and C. Einsele, and their associates for the excellent cooperation. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
