

the Economics of Urban Water Supply

By D. M. Madari

2007. Hardcover. Book Condition: New. 292 The Urban Water Supply was, is and will be a big challenge to the civic authorities, more particularly in the fast urbanizing cities such as gulbaraga and Solapur cities of Karnataka and Maharashtra States. This book presents the management of municipal water resources in an organised from amenable for economic analysis and succeeds in identifying the areas for further research. The recommendation of the study for rainwater harvesting is the one which two corporations can not simply overlook. The roof water harvesting is the other policy suggestion which has not been practiced by the citizens so far, which the author feels is highly unfortunate. About The Author:- Dr. D.M. Madari (b. 14-6-1974) obtained his B.A. B.Ed., degree from Gulbarga University Gulbarga. He also received M.A., M.Phil., and Ph.D, degrees in Economics from the gulbarga University, Gulgarga, He worked as a Researce Staff for various Researcn Projects funded by UGC, New Delhi, Ministry of Social Justice and empowerment, Govt. of India, New Delhi, and Dept. of Planning. of Karnataka. He was on the guest Faculty of Management, U.G.C. (from june-October 2003). He has also invited as Resource Person to conduct the development lasses for various...
