Among the numerous works that have been published since the days of Adam Smith s Wealth of Nations, there are none, on the above subject, that have attempted to give an exposition of the science based upon a Cycle of Seasons, in each decade, beginning on a specific, and ending on a definite year, making within this period a full decade of ten years, and thus, as it were, repeating the same or nearly a similar course each decade, thus forming a regular periodic Cycle of Seasons. In treating the above sciences upon this principle, it renders them much more practical, more closely applicable to the real or actual business of life; their truths are more readily apprehended or understood; they explain themselves under a more easily remembered formula. The subject of a Cycle of Seasons has always been a trying if not a difficult one to work out by a statistical evolution. I am myself ashamed to acknowledge, after more than twenty years of thought, of labour, and almost endless correspondence upon this question, it is so very moderately advanced as yet in my hands; but upon it I could gain little assistance from my predecessors, nor much from my contemporaries. But from many scientific friends and correspondents I received an amount of encouragement to persevere I acknowledge with sincere gratitude, and tender to those of them now living my best thanks. The question is, under my exposition, at best only in a tentative state, but capable of being extended and turned to valuable account in the future development of economic and financial science. It may in time, in more able bands than mine,...
