# Machine Learning with Swift : Artificial Intelligence for iOS: Create intelligent iOS applications (Paperback)

By Alexander Sosnovshchenko

Packt Publishing Limited, United Kingdom, 2018. Paperback. Condition: New. Language: English . This book usually ship within 10-15 business days and we will endeavor to dispatch orders quicker than this where possible. Brand New Book. Explore the high performance AI and Machine learning landscape for iOS platforms. About This Book * Implement Swift AI library, YCML, Machine Learning, Swift Brain, and more * Learn ML techniques from scratch, show implementation while building intelligent apps * Overview the whole spectrum of Apple numerical libraries and their hardware basis Who This Book Is For Developers who wish to learn the latest advancements in iOS for machine learning, and want to create intelligent iOS applications. Data Science professionals who are interested in knowing how to perform machine learning using in Swift will find this book useful. Familiarity with Swift programming and statistics is expected. What You Will Learn * Data collection and preparation. * Rapid Model prototyping in Swift playgrounds. * Detecting objects in images with Images classification techniques. * Feature extraction with Time series classification. * Clustering for user behaviour patterns detection. * Neural networks training, compression and deployment to iOS devices. * Implementing Chat bots, conversation and AI as an interface....

Reviews

I just began looking over this pdf. It is one of the most amazing pdf i have study. I discovered this book from my dad and i recommended this pdf to understand.
-- Merritt Kilback II

Good e book and useful one. I have got read and that i am confident that i will likely to go through once more again later on. It is extremely difficult to leave it before concluding, once you begin to read the book.
